**AQUATIC
TOXICOLOGY**

Author Index — volumes 40–42

- Aanesen, R.T., Eilertsen, H.C. and Stabell, O.B., Light-induced toxic properties of the marine alga *Phaeocystis pouchetii* towards cod larvae (40) 109
- Admiraal, W., see Bleeker, E.A. (41) 51
- Ahokas, J.T., see O'Halloran, K. (40) 141; van Dam, R.A. (42) 49
- Almeida, M.J., Moura, G., Pinheiro, T., Machado, J. and Coimbra, J., Modifications in *Crassostrea gigas* shell composition exposed to high concentrations of lead (40) 323
- Armknicht, S.L., Kaattari, S.L. and Van Veld, P.A., An elevated glutathione S-transferase in creosote-resistant mummichog (*Fundulus heteroclitus*) (41) 1
- Baird, D.J., see Barata, C. (42) 115
- Baker, R.T.M., Martin, P. and Davies, S.J., Ingestion of sub-lethal levels of iron sulphate by African catfish affects growth and tissue lipid peroxidation (40) 51
- Bamber, S.D. and Depledge, M.H., Responses of shore crabs to physiological challenges following exposure to selected environmental contaminants (40) 79
- Barata, C., Baird, D.J. and Markich, S.J., Influence of genetic and environmental factors on the tolerance of *Daphnia magna* Straus to essential and non-essential metals. (42) 115
- Baron, C.L., see Palace, V.P. (42) 149
- Barry, M.J. and Logan, D.C., The use of temporary pond microcosms for aquatic toxicity testing: direct and indirect effects of endosulfan on community structure (41) 101
- Barry, M.J., see van Dam, R.A. (42) 49
- Batel, R., see Jakšić, Ž. (40) 265
- Berzins, I.K., see Strandberg, J.D. (41) 343
- Besselink, H.T., Flipsen, E.M.T.E., Eggen, M.L., Vethaak, A.D., Koeman, J.H. and Brouwer, A., Alterations in plasma and hepatic retinoid levels in flounder (*Platichthys flesus*) after chronic exposure to contaminated harbour sludge in a mesocosm study (42) 271
- Besteman, E.G., see Hart, L.J. (41) 17
- Bihari, N., see Jakšić, Ž. (40) 265
- Birmelin, C., see Mitchelmore, C.L. (41) 193
- Bleeker, E.A., van der Geest, H.G., Kraak, M.H., de Voogt, P. and Admiraal, W., Comparative ecotoxicity of NPAHs to larvae of the midge *Chironomus riparius* (41) 51
- Block, M., see Pedersen, T.V. (40) 361
- Boonstra, A., see Grinwis, G.C.M. (42) 15
- Braven, J., see Lundebye, A.-K. (40) 23
- Brodeur, J.C., Daniel, C., Ricard, A.C. and Hontela, A., In vitro response to ACTH of the interrenal tissue of rainbow trout (*Oncorhynchus mykiss*) exposed to cadmium (42) 103
- Brouwer, A., see Besselink, H.T. (42) 271
- Burt, G.R., see Dyrinda, E.A. (42) 169
- Bury, N.R., Jie, L., Flik, G., Lock, R.A.C. and Wendelaar Bonga, S.E., Cortisol protects against copper induced necrosis and promotes apoptosis in fish gill chloride cells in vitro (40) 193
- Bury, N.R., Newlands, A.D., Eddy, F.B. and Codd, G.A., In vivo and in vitro intestinal transport of ³H-microcystin-LR, a cyanobacterial toxin, in rainbow trout (*Oncorhynchus mykiss*) (42) 139
- Cappello, M.S., see Lionetto, M.G. (41) 251
- Charest, P.-M., see Craig, A. (41) 265
- Charmantier, G., see Lignot, J.-H. (41) 277
- Chipman, J.K., see Mitchelmore, C.L. (41) 161, (41) 193
- C. Newman, M., see Tatara, C.P. (42) 255
- Codd, G.A., see Bury, N.R. (42) 139
- Cognetti, A.M., see Novi, S. (41) 63
- Coimbra, J., see Almeida, M.J. (40) 323

the first of these is the fact that the system is designed to be used by a wide range of users, from the casual user to the expert user.

The second of these is the fact that the system is designed to be used in a wide range of environments, from the desktop to the mobile environment. The third of these is the fact that the system is designed to be used in a wide range of languages, from English to Chinese.

The fourth of these is the fact that the system is designed to be used in a wide range of applications, from the simple application to the complex application. The fifth of these is the fact that the system is designed to be used in a wide range of industries, from the health care industry to the financial industry.

The sixth of these is the fact that the system is designed to be used in a wide range of countries, from the United States to the United Kingdom. The seventh of these is the fact that the system is designed to be used in a wide range of cultures, from the Western culture to the Eastern culture.

The eighth of these is the fact that the system is designed to be used in a wide range of languages, from English to Chinese. The ninth of these is the fact that the system is designed to be used in a wide range of applications, from the simple application to the complex application. The tenth of these is the fact that the system is designed to be used in a wide range of industries, from the health care industry to the financial industry.

The eleventh of these is the fact that the system is designed to be used in a wide range of countries, from the United States to the United Kingdom. The twelfth of these is the fact that the system is designed to be used in a wide range of cultures, from the Western culture to the Eastern culture.

The thirteenth of these is the fact that the system is designed to be used in a wide range of languages, from English to Chinese. The fourteenth of these is the fact that the system is designed to be used in a wide range of applications, from the simple application to the complex application.

The fifteenth of these is the fact that the system is designed to be used in a wide range of industries, from the health care industry to the financial industry. The sixteenth of these is the fact that the system is designed to be used in a wide range of countries, from the United States to the United Kingdom.

The seventeenth of these is the fact that the system is designed to be used in a wide range of cultures, from the Western culture to the Eastern culture. The eighteenth of these is the fact that the system is designed to be used in a wide range of languages, from English to Chinese.

The nineteenth of these is the fact that the system is designed to be used in a wide range of applications, from the simple application to the complex application. The twentieth of these is the fact that the system is designed to be used in a wide range of industries, from the health care industry to the financial industry.

The twenty-first of these is the fact that the system is designed to be used in a wide range of countries, from the United States to the United Kingdom. The twenty-second of these is the fact that the system is designed to be used in a wide range of cultures, from the Western culture to the Eastern culture.

The twenty-third of these is the fact that the system is designed to be used in a wide range of languages, from English to Chinese. The twenty-fourth of these is the fact that the system is designed to be used in a wide range of applications, from the simple application to the complex application.

The twenty-fifth of these is the fact that the system is designed to be used in a wide range of industries, from the health care industry to the financial industry. The twenty-sixth of these is the fact that the system is designed to be used in a wide range of countries, from the United States to the United Kingdom.

Keyword Index — volumes 40–42

- Abalone, (41) 229
 Acclimation, (40) 171
 Accumulation, (41) 265
 Acetylcholinesterase, (40) 23; (40) 311
 ACTH, (42) 103
Adamussium colbecki, (40) 375
 African catfish, (40) 51
 Aldehyde dehydrogenase, (41) 63
 Algae, (40) 109; (41) 213
 Aluminum, (42) 67
 Ammonia, (40) 171, (41) 325
 Antioxidant defenses, (40) 375
 Aquatic cell culture, (41) 31
 Aromatase, (42) 1
 Arsenite, (40) 79, 301
 Artefacts, (40) 293
 Aryl-hydrocarbon-receptor, (41) 31
 Aryl-hydrocarbon-receptor nuclear translocator, (41) 31
Asterias rubens, (40) 1
 Autometallography, (40) 123
 Autoradiography, (41) 265
- Basal laminae of digestive tubules, (40) 123
 Benzo(a)anthracene, (40) 157
 Benzo(a)pyrene, (42) 229
 Benzo[a]pyrene, (40) 79, (41) 193
 Bioaccumulation, (40) 63
 Bioassay, (40) 335, (42) 287
 Bioavailability, (42) 211, 229
 Bioconcentration kinetics, (41) 301
 Biomarker, (40) 79, 101
 Biomarkers, (40) 23 (40) 375
 Biomonitor, (41) 125
 Biomonitoring, (40) 63, 293
 Biotransformation, (40) 157, 101 (41) 83
 Black silver deposits, (BSDs), (40) 123
 Bleached kraft pulp mill effluent, (BKME), (40) 101
 Blood cells, (41) 161
 Brain glutamate and glutamine, (41) 325
 Brown trout, (41) 161
- Cadmium, (40) 203, (41) 251, 265, (42) 103
 Cadmium toxicity, (41) 187
Caenorhabditis elegans, (40) 37, 255
 Calcium, (42) 49
Callinectes sapidus, (41) 83
Carcinus maenas, (40) 79, 203
 Cardiac activity, (40) 23
Ceriodaphnia, (41) 101
 Chemical descriptors, (41) 51
 Chinook salmon, (40) 101
Chironomus, (41) 265
Chironomus riparius, (41) 51
 Chlorate, (41) 213
Chlorella vulgaris, (42) 67
 Chlorite, (41) 213
 Chlorobenzenes, (41) 301
 Chlorthion, (41) 301
 Clam leukemia, (41) 343
 Clams, (42) 1
